Simple to install

The patented **Jexis Door Ejector** was designed in New Zealand using Kiwi ingenuity and commitment to quality.

The **Jexis Door Ejector** is a simple design solution which eradicates the need for clumsy door clasps on pocket doors. Fitted neatly to the hidden edge of the door and press-release operated, it is whisper quiet and works as if gliding on air.

Using durable glass fibre technology, the **Jexis Door Ejector** has been performance tested to outlive any home and will not degrade, rust or require maintenance once installed.
